⚠️ ARTWORK SPECIFICATIONS>>>SUBLIMATED APPARELS ⚠️
VERY IMPORTANT AND PLEASE READ CAREFULLY!!!

💡 ARTOWRK SPECIFICATIONS:

FORMAT:	Preferred *. AI Vector Format or *. PDF generated from Illustrator CS4 (PC)	VERSION:	Not higher than CC	RESOLUTION:	Preferred to be 300 dpi
TYPE:	Must PC compatible	COLOR PROFILE:	CMYK	FONTS:	*.TTF Font file OR All curved/outlined
COLOR MATCHING:	Color Gear Colour Plate OR PMS Colours to match				

💡 ARTWORK GUIDELINES

- All bitmap format logo is requested to be output in min. 300 dpi resolution and in CMYK colour profile
- All bitmap image download from internet is low resolution and won't be sharp after printing.
- Colours other than our colour plate would take longer time for colour matching which may lengthen the turnaround time.
- Colour test is always welcome and free.
- Colours showing on computer is not the colours actually printed.
- Design on garments is different from design of other medias. Pattern/Panel/Cut/Sewing seam must be taken into account.
- Connecting artwork between garments panels may not be achieved.
- One template for full size range. Scale up/down artwork across sizes may generate longer lead time and higher cost.

💡 **Colour printing doesn't mean 100% colour binding. Sublimation printing effects are impacted by temperature, humidity and a lot other factors. 5% colour tolerance is industrial standard for sublimated garments.**
